The RAINSTOPPER

Unwanted rainwater adds to the cost of sewage treatment. Eliminate unwanted rainwater from your system with Rainstopper™ manhole inserts.

FEATURES:

- Easily installed by one person.
- Made from extremely durable HDPE plastic.
- Weight - two pounds.
- Sewer gas will be vented with a non-mechanical device.
- Less Maintenance due to no moving parts

Estimates on Rainwater treatment costs per manhole

On an average rainy day a manhole will allow 2,000 to 9,000 gallons of inflow to the treatment system.

BENEFITS:

- Stops flow of rainwater into sewage systems.
- Control manhole odors.
- Keeps dirt out of the system.
- Helps prevent manhole rattling and flipping due to street traffic.

MINIMUM COST \$50.00 per year per manhole*

MAXIMUM COST \$500.00 per year per manhole*

*These figures based on an average yearly rainfall in the SW region and selected engineers' estimate on sewage treatment cost.
