Stainless Steel Rainstopper™

Estimates on Rainwater
treatment costs per manhole

On an average rainy day a manhole
will allow 2,000 to 9,000 gallons of
inflow to the treatment system.

Unwanted rainwater adds to
the cost of sewage treatment.
Eliminate rainwater from your system
with the Rainstopper™
manhole cover insert

MINIMUM COST
\$50.00 per year per manhole*

MAXIMUM COST
\$500.00 per year per manhole*

*These figures based on average yearly rainfall
in the SW region and selected engineers' estimate
on sewage treatment cost.

FEATURES:

- Easily installed by one person.
- Made from Corrosion Resistant High Strength Stainless Steel.
- Weighs only ten pounds.
- Sewer gas will be vented with a non-mechanical device.
- Less maintenance due to no moving parts.
- Available in 304 SS or 316 SS.
- Sizes for many different manway openings

BENEFITS:

- Stops flow of rainwater into sewage systems.
- Control manhole odors.
- Keeps dirt out of system.
- Helps prevent manhole rattling and flipping due to street traffic.
- Tether promotes safety - insures replacement
